## WELCOME TO GEOPORTAL

The GEOPortal provides an entry point to access remote sensing, geospatial static and in-situ data, information and services.

[More ...](#)

The GEOPortal provides three main ways to initiate a search for GEOSS resources:

1. **Free Text** - Entering terms into the search field in the title bar
2. **Browsing via Societal Benefit Areas** - Filtering resources in the left side menu according to the GEOSS Societal Benefit Areas
3. **Location** - Selecting a location on the interactive globe (click to activate) also displaying latest GEO related items

Click to browse  
resources by  
location

## South African Environmental Observation Network

A comprehensive, sustained, co-ordinated and responsive South African Earth observation network that delivers long-term reliable data for scientific research and informs decision-making for a knowledge society and improved quality of life.

Welcome to the SAEON Data Repository. This is the primary source for comprehensive information about scientific and research data sets collected throughout the South African Environmental Observation Network.

### Search for SAEON Data

#### Searching: All Organizations

The repository search system is used to locate data sets of interest by searching through existing registered data sets. Presently the search covers all fields, including author, title, abstract, keywords, and other documentation for each data set.

Use a '%' symbol as a wildcard in searches (e.g., '%herbivore%' would locate any phrase with the word herbivore embedded within it).
